

± **1**  TEMPERATURE

± **5** %
RELATIVE HUMIDITY

= SAVINGS

- *Increase indoor air quality and thermal comfort*
- *Minimize energy costs*
- *Prevent mold problems*
- *Part load efficiency increases of up to 17%*

The Digital Precise Air Control (D-PAC™) System will accurately control space temperature and relative humidity under **ALL** space and ambient conditions with the lowest possible energy consumption - and only AAON has it. D-PAC systems can offer much higher energy efficiency than conventional equipment because of the patented sequence of operation and the variable capacity compressor design used. The annual savings of the D-PAC system in energy costs provides a substantial return on investment when compared to conventional temperature and humidity control systems. When you want to provide total comfort along with significant energy savings choose the AAON D-PAC system. Find an AAON representative and discover more solutions that AAON can provide for your temperature and humidity problems at aaon.com.
