

Need Cool, Dry Air?

Here are some of your **AAON®** Solutions.

- 6 Row evaporator coils
- Hot gas reheat
- Hot gas bypass
- Energy recovery enthalpy wheels & 4" filters
- Stainless steel gas-fired heat exchangers (with 25 year non-prorated Warranty)
- Modulating gas-fired heat exchangers
- Stainless steel drain pan

- Double wall cabinet and doors
- DDC controls with color coded wiring diagrams
- 2500 hour salt spray tested polyurethane paint

The AAON RM and RN Series continue the tradition as the premier vertical discharge rooftop conditioner. **It has been imitated but not duplicated.**

Engineering Excellence.

In today's competitive building environment, you can't afford to have a moisture problem. An "overcool" occupant space also is unacceptable and a waste of your energy dollars. The correct solution can be found with the many features offered by AAON.

The **AAON** product is built to your requirements, for your application. If you have high internal loads or a make up air situation, the factory built features avail-

able from AAON will avoid any future discomfort and energy wasting situations.

Maximize Moisture Removal – By selection of the Hot Gas Reheat option, the dehumidification will continue with the discharge air reheated to an acceptable temperature.

Make Up Air Requirement – When "neutral" air must be supplied under all weather conditions, the addition of the Hot Gas Bypass and Modulating Gas Heating option will meet the challenge.

All are AAON factory Engineered and installed at your selection and for your specific installation.

AAON – the leader in quality, innovative rooftop heating and cooling products. Your bottom line is our top priority.
