

At AAON, we are committed to continuously enhancing our products through regular software updates. The release notes below provide an overview of updates, features, and hot fixes introduced in the most recent software versions. This document may not include all changes, especially minor adjustments or security enhancements. Features may vary depending on user settings or environment.

Note: AAON software updates are rolled out in phases to monitor performance and adjust as needed before being available to all users. If you are unable to update your software but see new release notes, please check back soon for future availability. It is the responsibility of the building manager to ensure all devices remain current with the latest compatible software version.

RSMD-CM SS1170 Software release notes	
Software version 3.46 – Current Version	March 03, 2026
<ul style="list-style-type: none">• Hot Fixes:<ul style="list-style-type: none">○ Fixed an issue with Comp A1 not staging back on after staging off in Dehum mode.○ Fixed an issue where leaving the defrost mode did not return the condenser to its previous state.○ Fixed an issue with the compressor not shutting off after the Safety Stage Off Period was met.
