

At AAON, we are committed to continuously enhancing our products through regular software updates. The release notes below provide an overview of updates, features, and hot fixes introduced in the most recent software versions. This document may not include all changes, especially minor adjustments or security enhancements. Features may vary depending on user settings or environment.

**Note:** AAON software updates are rolled out in phases to monitor performance and adjust as needed before being available to all users. If you are unable to update your software but see new release notes, please check back soon for future availability. It is the responsibility of the building manager to ensure all devices remain current with the latest compatible software version.

<b>VCCX2-GH</b> <b>SS1171</b> <b>Software release notes</b>	
Software version 1.12 – Current Version <ul style="list-style-type: none"> <li>• Improvements to E-BUS Communications</li> </ul>	March 29, 2023
Software version 1.11 <ul style="list-style-type: none"> <li>• Improved condenser flush functionality</li> <li>• Minor Improvements to “Reset Defaults”</li> </ul>	January 30, 2023
Software version 1.01-1.07 <ul style="list-style-type: none"> <li>• <b>NEW FEATURE:</b> <i>Dry Mode Sequence</i> <ul style="list-style-type: none"> <li>○ Supported Units: VCCX2-GH</li> <li>○ Details: Dry Mode enhances dehumidification by allowing the evaporation coil temperature to drop below freezing, which promotes more efficient moisture removal from the air. To prevent frost buildup on the coils, Dry Mode includes frost monitoring and defrost cycles, ensuring that ice does not accumulate and hinder performance.</li> </ul> </li> <li>• Improved functionality of unit main fans at or near maximum settings</li> <li>• Improvements to Grow Mode heating, cooling, and reheating</li> </ul>	April 1, 2022
