At AAON, we are committed to continuously enhancing our products through regular software updates. The release notes below provide an overview of updates, features, and hot fixes introduced in the most recent software versions. This document may not include all changes, especially minor adjustments or security enhancements. Features may vary depending on user settings or environment.

Note: AAON software updates are rolled out in phases to monitor performance and adjust as needed before being available to all users. If you are unable to update your software but see new release notes, please check back soon for future availability. It is the responsibility of the building manager to ensure all devices remain current with the latest compatible software version.

RM454-D-B
SS3026
Software release notes

Software version 1.24 – Current Version   December 22, 2025
- Improvements:
    - Added a status screen for fan cleaning times that appears when fan cleaning is configured and the OAT is below 35°F.
    - Changed the minimum defrost interval time to 10 minutes; however, 30 minutes is still the default.
- Hot fix:
    - The onboard display now operates when the emergency shutdown binary input is activated and configured as an "Emergency Shutdown Input" in Prism.

Software version 1.23   December 15, 2025
- Initial release of the RP2040 version of the SS1193 RM454-D software.
